January 11, 1988

Mr. M. D. Lawton
Rio Algom Mining Corporation
La Sal Route
Moab, Utah 84532

Dear Mr. Lawton

Re: Annual Report and Map, M/037/001, Lisbon Mine and Mill

The enclosed annual report for the Lisbon Mine should be completed and returned to this office before February 15, 1988. Please also enclose an updated map of the mine and mill area with the annual report. This map should delineate between those areas to be covered under the NRC mill plan and the Division's notice of intention for the mine.

As you are aware, the Board of Oil, Gas and Mining agreed in November, 1987 to defer regulatory authority for uranium mill operation to the Nuclear Regulatory Commission. The requested map will assist the Division in separating the mine from the mill. A short explanation should be provided for any portion of the mill site which would normally be considered as part of the mine site (e.g., mine waste piles, water treatment ponds, warehouse, offices, access roads). County roads should be designated as such on the map.

Please contact me or Frank Filas of my staff if you should have any questions or need additional information.

Sincerely,

Lowell Braxton
